Insights

Target Weekend & Leisure Riders

- **Seasonal & Weekend Passes:** Casual riders peak heavily during weekends and warmer seasons (summer/fall). Offer discounted "Summer Passes" or "Weekend-Only Memberships" to lower the entry bar for seasonal users.
- **Target Tourist Hotspots:** Casual rides cluster around leisure locations like Streeter Dr & Grand Ave and Millennium Park. Place targeted digital ads, QR code promotions, or physical signage at these stations offering instant membership trial discounts.

Capitalize on Long Ride Times

- **Long-Ride Discounts:** Casual riders take much longer trips on average compared to members. Structure memberships to include extra included ride minutes or cheaper overage rates so frequent long-distance riders save more by subscribing.
- **Electric Bike Perks:** Since casual users frequently pick electric bikes, include free or discounted e-bike unlocks/minutes in the annual plan to make membership significantly more attractive.

Convert Commuters & Frequent Casuals

- **"Try Before You Buy" Credits:** Offer a deal where a percentage of single-ride or day-pass fees spent over the past month converts directly into credit toward an annual membership.
- **Rush-Hour Conversion Messaging:** A notable number of casual rides still occur during evening peak hours (around 5 PM). Target these riders with messaging showing how much money they would save converting their commute to an annual plan.
